

Aura Direct Vent Fireplace

Expansive Style. Breathtaking View.

Shown with Stainless Steel surround and fireglass kit

Black Texture inside trim kit and Old Rocky Creek log set

Make an Unforgettable Statement

The Aura linear fireplace offers exclusive features, unsurpassed style, and an amazing 70-inch viewing area. No other manufacturer offers a wider fireplace.¹

Interior options like porcelain panels, contemporary fireglass kits or driftwood logs create a stunning statement piece for your home or business. The flames produce an elegant burn that complements the sophisticated styling, and, when the fire is off, an included floor illumination kit ensures it loses none of its splendor. The ClearView non-reflective glass showcases the interior perfectly, providing a gorgeous view from any angle. For the finishing touch, choose from a variety of beautiful surrounds.

Iron Age surround and contemporary stone and fireglass kit

The included floor illumination kit makes a stylish statement, even when the fireplace isn't lit.

Optional Driftwood Log Set

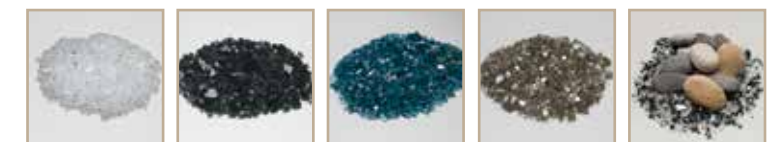

Old Rocky Creek Log Set

Designed with You in Mind

When it comes to installation, the Aura offers a unique advantage as the widest standard production fireplace using only one, 5" x 8" vent pipe.² This helps maintain a clean look with minimal exterior obstruction to your home or business. The floor illumination kit uses standard halogen light bulbs found in a typical hardware store, and it's convenient to convert from natural gas to propane — with the included LP conversion kit, you don't even have to remove the burner.

Fireglass Color Options

Finish Options

Black Texture Surround Iron Age Surround Stainless Steel Surround Black Texture Inside Trim Black Porcelain Liner (Required)

1. At time of publication. Based on standard production models. Excludes custom models.

Majestic Aura shown on cover with Black Texture surround and optional Old Rocky Creek log set.

2. At time of publication. Excludes custom models. Other similar non-custom models require non-standard venting and in some instances dual vents, increasing the overall installation costs.

Ultimate Fireplace Control

Enjoy more available features with the exclusive Total Signature Command® System. The Smart Mode® thermostat automatically controls ignition and modulates flame height to keep temperatures at optimal comfort levels to help you save energy. And, you'll enjoy up to 51,000 BTUs of uninterrupted heating power in the event of a power outage, thanks to the automatic battery back-up feature. In addition to the wall mounted control, the included touch-screen, hand-held remote makes it easier than ever to control the 3-step flame height, and accent lights.

Total Signature Command Control Features

- A/C control with battery back-up
- Electronic ignition
- Cold climate pilot optional setting
- Hi/lo 3 step flame adjustment
- Accent light with three step dimming
- Touch button command center
- Full function TSFSC hand held touch screen remote control included
- Comes standard with SCSACM A/C module

Safety First.

Because our fireplaces were designed to deliver maximum BTUs to provide the best heating solutions for your home, the units will become hot to the touch. Consequently, all Majestic direct vent fireplaces come standard with a certified safety barrier. The screen barrier affixes to your fireplace and has been approved by a third party testing agency to conform to specific standards designed to prevent injury from hot glass.
